

MobiProjects® A Suite of Easily Configurable Mobile Applications for the Marine Business

Implemented within a few days, MobiProjects® suite of simple mobile applications enables consistent data-gathering and treatment across of geographical and organizational boundaries.

General concept

Shipping and Maritime organization still often maintain cumbersome paper-based processes for remote work in such areas such as Vessel management system (daily report, on-hire & suitability survey, inspection report), Safety (Observations), Logistics (Post agency commitments, crewing check list), Quality (check list, vendor inspection, punch list), etc...

The paper based process is typically labor intensive, costly, creates delay in data availability, lowers the effectiveness of highly paid resources, slows the work through manual signatures, and prevents proper follow-up and dashboard creation.

Platform

Today, the ubiquity of smart-phones and tablets makes it easy to give everyone – employees, contractors and other temporary manpower – your project-specific interactive tool by simply downloading an application in a few minutes.

MobiProjects® value proposition combines ProjectAppServices®'s intimate knowledge of the Marine and Shipping business with the existing, proven and flexible Upvise® platform combining the best of mobility technology.

Key Features

- Simple systems that work **without the need for specific hardware investment**,
- MobiProjects® can **work effectively online and/or offline**
- **Implementation is a matter of days** even with customization requirements,
- Information can be captured at the source, **enriched with photographs, smart tags and other data gathering devices.**
- MobiProjects® database provides to the Client's management in the **back office accurate and real-time dashboards.**

Our Product Differentiator

- **Bring Your Own Device (BYOD) concept**, any smartphones or tablets allowing work across organizational boundaries,
- **Multi-platform ability:** MobiProjects works with any operating system and internet browser,
- **Ability to work off-line** for remote sites, low connectivity worksites, hence appropriate for Logistics and Marine support activities,
- **Seamless data re-synchronization** which allow immediate update, real time dash-boarding and data visualization for management,
- **Easy implementation of workflows** for approval with signature-on-the-go,
- **Proven technology:** our technical partners Upvise® have already significant track record in other industries.

The flexibility of our platform allows us to deploy your MobiProjects® applications for your fleet in few days even with content and workflow customization.

Key Value proposition

- MobiProjects® is the appropriate tool for all those applications requiring **geographically spread interventions**.
- MobiProjects® **improves the productivity of highly-paid personnel** by removing cumbersome clerical work;
- **Approvals can be obtained with original signatures on-the-go** making it easy to deal with your operational needs.
- MobiProjects® **removes the need to chase paperwork** and certificates, making data easier to retrieve reliably e.g. for as-built dossiers, invoicing,
- MobiProjects® provides better site supervision and project management with **real-time accurate dashboards** that allow to take the right decisions.

For Marine and Shipping, the value proposition for mobility as a game changer is clear: higher efficiency enabled through “information-at-the-finger-tips.”
